Information Disclosure Statement

The Information Disclosure Statements received 12/17/2010 have been considered. This IDS is resubmitted to further clarify the publication date for several prior art references previously submitted with IDS dated 7/27/2005 and 7/19/2004. See attached PTO-1449(s).

Allowable Subject Matter

The art of record neither teaches nor fairly suggests method of independent claim 1 including the following combination of limitations defining the main invention/embodiment:

" .. a performance process configured to determine a level of performance for the plurality of storage locations and partition the plurality of storage locations into a plurality of regions as determined by their different levels of performance ..

.. a performance measurement system configured to scan storage locations of the storage device and determine the different levels of performance for the storage locations, and specifically wherein the performance measurement system performs experimental read and write operations and determines the different levels of performance from experimental data collected in the read and write operations,

... a RAID controller, for assigning a first RAID level configuration to a first set of aggregated logical block names of the storage device, and assigning a second RAID level configuration to a second set of aggregated logical block names of the storage device, the first and second RAID level configurations being different from each other ..
".

The art of record neither teaches nor fairly suggests method of independent claim 11 including the following combination of limitations defining the main invention/embodiment:

" .. determining a level of performance of the plurality of storage locations, partitioning the plurality of storage locations into a plurality of regions as determined by their different levels of performance,

.. wherein the different levels of performance are further determined by performing experimental read and write operations and determining the level of performance from experimental data collected in the experimental read and write

operations,

.. assigning a first RAID level configuration to a first set of aggregated logical block names, assigning a second RAID level configuration to a second set of aggregated logical block names, the first RAID level configuration and second RAID level configuration being different from one another “.

The art of record neither teaches nor fairly suggests method of independent claim 19 including the following combination of limitations defining the main invention/embodiment:

“ .. a partitioning process configured to partition the storage locations into regions and aggregate the logical block names of the storage locations in the partitioned regions having an identical level of performance to a selected section of the logical block name space, thereby providing two or more differentiated classes of storage on the storage device to one or more clients accessing the system;

.. a performance measurement system that scans storage locations of the storage device and determines the level of performance of the storage locations, wherein determining performance further comprises performing experimental read and write operations and determining the level of performance from experimental data collected in the experimental read and write operations “.

The remaining dependent claims, not specifically mentioned, are allowed for the same rationale as the independent claim(s) being based from.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
